

CACHALOTS DE MÉDITERRANÉE

CARTES D'IDENTITÉ

CONCEPTION : Véronique et François Sarano

CRÉATION GRAPHIQUE & ILLUSTRATIONS : Marion Sarano

PHOTOS : Véronique Sarano, François Sarano, Marie Larivière, Stéphane Granzotto,
Frédéric Bassemayousse, Denis Ody, Didier Acézat

CALCUL IPI : Pascale Giraudet

© Longitude 181 - 2026

Les cartes d'identité sont organisées selon la forme de la caudale et la présence d'échancrures, immédiatement visibles à l'œil nu, sur son bord de fuite.

TYPE

ENCOCHE / MARQUES

TACHES

BLESSURE

SOUS MARINE

CONVEXE

Pointes de la caudale dirigées vers le bas sur la photo (vers l'avant de l'animal) et franchement sous la tangente à l'arrondi des lobes.

DROITE :

Pointes et lobes alignés horizontalement.

BICORNE

Pointes de la caudale dirigées vers le haut de la photo (l'arrière de l'animal) et qui remontent vers la tangente à l'arrondi des lobes.

FLÈCHE

Pointes de la caudale franchement dirigées vers le haut et lobes en dessous de la tangente aux pointes. Forme générale est en "V".

AVERTISSEMENT : Chaque cachalot, comme chaque être vivant, est singulier.

La forme de sa nageoire caudale peut ne pas correspondre tout à fait à l'une des 4 catégories.

Si il y a un doute sur la forme d'une caudale peu caractérisée, ne pas hésiter à rechercher dans les autres catégories.

De même, les échancrures retenues comme critère de sélection sont celles qui apparaissent au premier coup d'œil.

Petites échancrures ou marques blanches sur la caudale ou les flancs serviront ensuite à distinguer les individus.
